**PRODUCT DESCRIPTION**

The New Fibre Plus 1U Fibre 19" Optic Patch panel has been redesigned to optimise both the internal fibre management but also to add greater fibre density. Constructed from mild steel with a powder coated paint finish the panel is available in Black or Grey. The Patch Panel offers a flexible and highly versatile solution for optical splicing and patching. The Panels shallow depth allows it to be installed within the majority of standard racks and wall mounted enclosures. The integrated design features ensure that even once installed the Panel can be readily re-configured to accommodate the changing needs of today's high speed networks.
