

Outpost24's Vulnerability Management Solutions

The Outpost24 Vulnerability Assessment and Management solution allows your enterprise to discover, analyze and prioritize the remediation of vulnerabilities on your network. Outpost24's solutions are a Software as a Service (SaaS) and agent-less and can be immediately deployed.

Establishing a Vulnerability Management Program using the Outpost24 solution allows you to always have a clear picture of the risks to your assets. Rather than reacting to threats after they occur, you can proactively control or eliminate them. This will allow you to get the most benefit from your limited resources, allowing you to focus on proactively managing the most critical risks. Outpost24 offers a proven solution to Vulnerability Management with our leading technology and methods that allow you to get started easily and quickly benefit from the results.

VULNERABILITY MANAGEMENT PROGRAM

TRACK PROGRESS

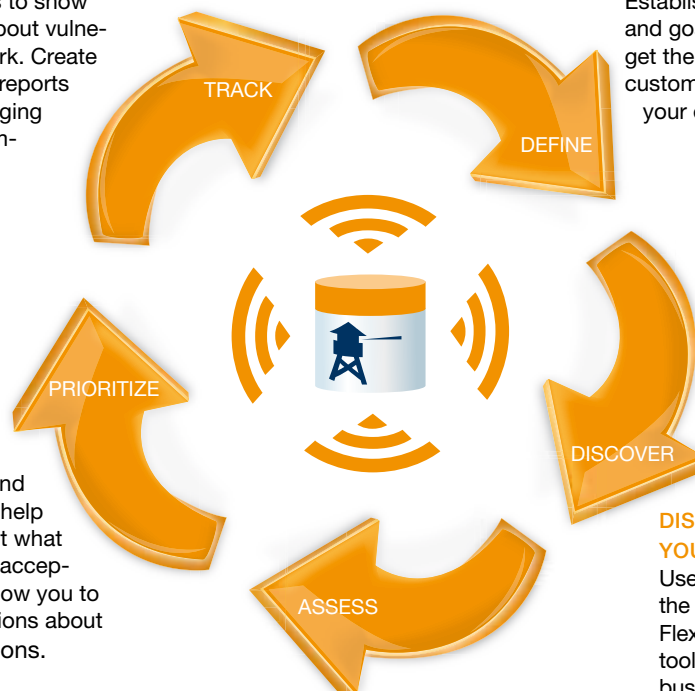

Use trending features to show statistics over time about vulnerabilities in the network. Create custom comparative reports to show what is changing and how things are improving over time.

DEFINE YOUR PROGRAM

Establish roles, responsibilities and goals for your program to get the best results. Use our customizable solution to meet your exact needs.

PRIORITIZE REMEDIATION

Analyze reports and review descriptions and recommendations to help make decisions about what to fix. Using industry accepted risk scores will allow you to make informed decisions about timeliness for resolutions.

DISCOVER

DISCOVER & MANAGE YOUR ASSETS

Use powerful tools to discover the assets in your network. Flexible asset management tools allow you to group by business unit, technology, location, and security needs.

ASSESS YOUR NETWORK

Schedule scanning based on your needs. Use out-of-the-box best practice templates for scanning or create your own based on your individual needs.

Key Features: HIAB

CENTRALIZED ADMINISTRATION

- Trouble ticket system and verification scan templates to track remediation.
- Encrypted user access from anywhere.
- User customizable scan settings to focus on different asset assessment needs.
- Flexible system for grouping network elements.
- System to allow users different roles and rights.
- Summary dashboard to allow for quick overview of status.
- Encrypted backup option for configuration and customizations.

ANALYSIS

- Information on each vulnerability to facilitate its analysis.
- Highly accurate identification of vulnerabilities and elimination of false positives and negatives.
- Customized reporting options.
- Powerful trend analysis features.
- Reporting in PDF, HTML, XML, and XLS.
- Delta reporting features.
- Risk rating system based on CVSS v.2 to speed prioritization efforts.
- Upload encrypted key to be used when sending reports via email.
- Detailed findings include descriptions, risk ratings, and remediation recommendations.

* HIAB and OUTSCAN combined

AUTOMATED

- Powerful asset discovery tools.
- Agent-less scanning technology.
- Automatic updating of features through SaaS model.
- Monitoring and alerting of changes in network.
- System event audit log features supporting Syslog and SNMP.
- Many options for scheduling of scans based on user's needs and preferences.
- Repeatable and consistent scan results.

SCALABLE

- Distributed and scalable scanning of network assets with centralized reporting.
- User customizable bandwidth limiter.
- Vast support for scanning of all types of network technologies, constantly evolving to meet demands.

ACCURATE

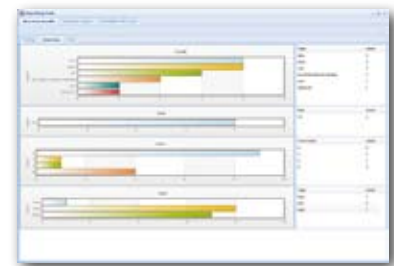

- Third party audit perspective.
- Internal and external scanning perspectives. *
- Security of all information is protected to ensure its confidentiality, integrity, and availability.
- Authenticated and unauthenticated scanning.
- Non-intrusive scanning technology.
- Extensive coverage for vulnerabilities in common web applications.
- Frequently updated with new vulnerability scans.

LICENSING

- Phone and email support by Security Experts 24/7/365.
- Unlimited number of users.
- 3 year warranty of Appliance.

The HIAB interface visualizes statistics...

...gives a quick visual overview...

... and displays a multi-window interface inside any browser.
